Ever since super star, Ariel Oakley, could remember, she's been in love with her hunky co-star Bryce Valentine. The only problem: Bryce has been in a relationship with another ac-tress for quite some time. Not wanting to be "the other woman", Ariel never pursued any of her feelings for him despite how well they connected. When Bryce suddenly becomes single, both of their worlds are flipped upside down. To help him nurse his aching heart, Ariel invites him back home to her family farm for some much needed peace and quiet from the paparazzi. What neither of them expects is to fall in love: with the calm, with the country, with each other. But how much of it is real, and how much of it is a means to escape a broken heart?
