Filled with pop-ups, pullouts, and mobiles, The Art Pack is a completely new way to experience artists' use of color, line, composition, perspective, and optics, as well as a lavishly illustrated introduction to the history of Western art. With The Art Pack you can: Examine a three-dimensional model of an artist's studio painted by Vermeer See for yourself how an artist solves problems of perspective by using a replica of "Alberti's veil" and a pop-up viewer Break up light with a "camera obscura" and a filtered "Claude glass" Study the combinations of colors that produce shades and tones, by manipulating a real color wheel Hear (on audiocassette) why the world considers great paintings masterpieces, and see them reproduced in full color And much more!
