Everyone is talking about Hot Toddy. Who is LJ? Does she even know? Growing up in the heartland of America, LJ didn't learn what the world was really like outside the boundaries of her family farm until she left for college in Southern California. She immediately falls head over heels in love with a hot surfer and his sun-and-surf laid-back lifestyle. She picks up modeling and acting gigs to pay down her student loans. After a few unbearable twists of fate, LJ abandons her Midwestern values for the temptations of Hollywood—and that's only the beginning.

Caught in the pressure of balancing a lie and reality, and with her seemingly new best friend, Sidney, becoming more viperous at every turn, LJ can no longer escape the fall down the rabbit hole into a dark world of money and power, where sex sells and everything is for sale. Hot Toddy is for every young woman who's ever let her foolishness consume her. Part naughty thrill ride, and part serious take on coming of age in a time when wealth and celebrity seem to be the only things that matter, Hot Toddy promises to be this year's best read, with big belly laughs, engaging women characters, and an unexpected finale that will leave you wanting more.
